

# Al Sabbagh Louai

+1 (438) 322-1833 | 591 Avenue Ash, Montréal, QC, H3K 2R5 | [lou.als2904@gmail.com](mailto:lou.als2904@gmail.com) | [github.com/louals](https://github.com/louals) | [linkedin.com/in/louai-alsabbagh](https://www.linkedin.com/in/louai-alsabbagh) | [louaialsabbagh.tech](https://louaialsabbagh.tech)

## PROFILE

Fresh graduate and full-stack developer with hands-on experience building end-to-end web applications using JavaScript, TypeScript, Python, and cloud technologies. Skilled in BPMN for modeling business processes, optimizing workflows, and turning client needs into technical solutions. Strong problem-solver with Agile experience across full project cycles.

## EDUCATION

**Institut Teccart**  
*Diploma of College Studies*

- Cote R : 31.595
- Specialized in full-stack development, UI/UX integration, data modeling, and cloud workflows.
- Notable projects: e-commerce platforms, AI-powered matching systems, full admin dashboards, and BI reporting workflows that turn raw data into clear, actionable insights

Montréal, QC  
Sep 2023 — Sep 2025

## WORK EXPERIENCE

**Full-Stack Developer Lead**  
Techniverge inc.

Septembre 2025 — Present  
Montréal, QC

- Improved system architecture by setting strong frontend & backend standards, resulting in cleaner, scalable codebases.
- Boosted team performance by mentoring interns and reviewing code, increasing delivery quality and speed.
- Increased app speed and stability by 60% through targeted optimizations, improving user experience.
- Applied BPMN to structure workflows, reducing development bottlenecks and improving coordination.

**Environment:** Python, TypeScript, JavaScript ,React, Node.js, FastAPI, PostgreSQL, MongoDB, Firebase, Docker, Git, BPMN, UML, Agile (Scrum)

**Web Developer Intern**  
Win Technologies

Juillet 2025 — Septembre 2025  
Montréal, QC

- Delivered a complete real-estate platform, improving user flow and navigation clarity and increasing engagement across key sections.
- Reduced recurring issues by refactoring core modules, resulting in a more stable product during production cycles.
- Accelerated feature delivery by collaborating with product teams, ensuring better alignment with user needs.
- Increased process transparency by creating BPMN diagrams documenting user journeys and internal validation flows.

**Environment:** React, TypeScript, Firebase, reCAPTCHA API, Git, Figma , BPMN

**Full-Stack Developer**  
Ibong Sport

Janvier 2025 — Mai 2025  
Montréal, QC

- Built a full management system that automated bookings and payment cycles, reducing manual operations for the client.
- Designed a comprehensive admin dashboard, cutting operational workload by 50% through better data visibility and control.
- Improved long-term maintainability by restructuring the application architecture for better performance and reliability.

**Environment:** React.js, Node.js, MongoDB, Render Cloud, Stripe, Git

**AI Developer Intern**  
Institut Teccart

Mai 2025 — Juillet 2025  
Montréal, QC

- Developed an intelligent job-matching platform, improving recommendation accuracy through structured data modeling and optimized backend logic.
- Created a precise scoring system for job-to-user matching, improving relevance and match success rates.
- Produced comprehensive documentation for the platform, including user stories, use-case diagrams, class diagrams, and database schema diagrams, ensuring clear communication and alignment across the development team.

**Environment:** React TypeScript, Python, FastAPI, PostgreSQL, MongoDB, OpenAI API, Render Cloud, Git

## PROJECTS

---

### Intelligent RAG Chatbot

- Built a personalized RAG chatbot capable of retrieving, analyzing, and answering from custom datasets, improving response relevance.
- Designed a scalable architecture ensuring fast query resolution and consistent uptime for continuous usage.
- Documented ingestion, embedding, retrieval, and response flows through BPMN to improve debugging and system transparency.

**Environment:** Next.js, DataStax Astra DB, OpenAI API, Git

## SKILLS

---

- **Programming Languages:** JavaScript (ES6+), TypeScript, Python, HTML5, CSS3, C sharp, SQL
- **Frameworks & Libraries:** React, Vue.js, Next.js, FastAPI, Node.js, Express.js, Tailwind CSS, ASP.NET, Three.js, Axios
- **Databases & Cloud:** PostgreSQL, MongoDB, Firebase, MySQL, Render Cloud, Google Cloud Platform, Docker, CI/CD
- **Tools & APIs:** Git, Figma, Stripe API, reCAPTCHA API, OpenAI API
- **Workflow & System Design:** BPMN, UML (Class, Use Case, Sequence), User Stories, Workflow Design
- **Languages:** Fully bilingual in French and English (Native), Spanish (Beginner)
- **Certifications:** TCF Canada C1 - NCLC 9
